

## Maleware, Ransomware, Trojans and more

Try the following when (some) PC problems arise...

<u>Fix</u>	<u>Source</u>
Combofix	BleepingComputer
TDSSkiller	BleepingComputer
MalewareBytes	Malewarebytes
Rogue Killer	Adlice
Spybot Search and Destroy	SaferNetworking
CCcleaner	Piriform

## Google, Chrome and Android important URLs

(from <http://www.prophethacker.com/2016/08/important-urls-every-google.html>)

## Outlook Clutter Folder

Shut it off, yet the folder will not be deleted, don't delete it or it will recreate itself and may turn the process back on. To shut off clutter:

Log onto your email.

Click on the Gear icon at the top right of the page

Click on "Options"

Click on "Automatic Processing" in the "Mail" section

Click on "Clutter"

Uncheck the box labeled "Separate items identified as clutter"

Click the "Save" button at the top of the page
