Laborer: helped to clean up oil spills, concrete work and shoveling were excavation machines are unable to reach.

Driver: deliveries in a Ford F-550 dump truck up to five yards of product. Loaded trucks up with small pay loader, moved pallets with forklift. Fueled up machines and screeners.

- Smuggler's Notch, Jeffersonville VT. Late December, January, February, March 1999-2002

Children's part time ski instructor ages 6 to 12.

Take the children skiing, assess their ability, and teach them new skiing techniques, private one on one lesson.

Internship

- Bayer Pharmaceutical, West Haven CT. Summer 2001
During the summer of 2001 I had an internship at Bayer Pharmaceutical West Haven Ct. under the supervision of Health, Environment, Safety. Here is a list of the activities that I preformed during the internship.

Made an inventory of all waste on site, and the waste's movement, (radioactive waste, biohazard waste, solvent waste, hazardous waste, non-hazardous waste, general rubbish, and recycling. And identified locations on site map where these wastes were collected for Computer Aided Drafting

Updated storm water log data for log permit compliance with Publicly Owned Treatment Works (POTW) permit.

Performed audit of biomedical waste tracking system: Stericycle manifests.

Performed a site wide storm water inspection of Bayer West Haven.

Worked with the H.E.S. Department on forms for Bayer's waste minimization program. The program is in place to comply with the Resource Conservation and Recovery Act. The act requires hazardous waste generators who transport their wastes off-site to certify on their hazardous waste manifests for transportation, that they have programs in place to reduce the volume or quantity and toxicity of hazardous wastes generated to an extent that is economically feasible.

Chemical spill cart inventory and assembly.

Air emissions data entry for permit compliance: diesel generator runtime data calculations (for April, May, June emissions) & solvent volume calculations (for April, May, June emissions), for the State of Connecticut General Permit to Limit Potential to Emit from Major Stationary Sources of Air Pollution. To comply with the record keeping section of the General Permit.
